SUMMARY

Results-driven Full Stack Developer with 3+ years of experience building scalable, high-performance applications using React.js, Next.js, TypeScript, Node.js, Django, Python, Java, and Spring Boot.

Expertise in frontend architecture, reusable component design, accessibility standards, and client-side performance optimization with Webpack, Vite, Tailwind CSS, Redux, and Zustand.

Strong backend capability in RESTful API development, authentication/authorization flows, and database modeling with MongoDB, MySQL, and PostgreSQL, alongside solid proficiency in Java/Spring Boot and Node.js for server-side development.

Proficient in modern DevOps practices, including CI/CD pipelines, Git-based workflows, cloud-ready deployments (Vercel, containerized services), and writing clean, testable, maintainable code.

Recognized for analytical problem-solving, ownership mindset, clear technical communication, and effective collaboration within cross-functional agile teams.

EXPERIENCE

Frontend Developer

SAULTECH

📅 2022 - 2025 📍 Remote

Saultech is an IT Company which specializes in building website to local clients in Gombe and around Nigeria.

- Built modern, responsive web interfaces using React.js, Next.js, Tailwind CSS and Zustand
- Collaborated cross-functionally with designers and backend engineers to deliver seamless UI/UX.
- Implemented reusable component architecture, improving development speed.
- Optimized load performance and reduced bundle sizes using modern tooling.

Frontend Developer - Voluntering

United State of Africa (USAF)

📅 2022 📍 Remote

🌐 <https://usafrikagov.com/>

United States of Africa is an Initiative working towards unification of all people of African descent under one political kingdom based in Africa.

- Worked with Git for version control in a collaborative agile environment.
- Participated in sprints, standups, and cross-team reviews, improving delivery consistency.
- Developed and maintained user-facing websites using HTML, CSS, JavaScript, and ReactJS.

PROJECTS

Github

📅 11/2024 - 04/2025 📍 Remote

🌐 <https://github.work>

Github is online job search, job matching platform and professional networking platform

- Developed responsive UI and dashboards, integrating React chart libraries for analytics. Leveraged Zustand to handle both global and local state management efficiently.

Car Showcase App

🌐 <https://github.com/jkey-byte/car-showcase>

- Built a responsive car catalogue using Next.js, Tailwind CSS, and Rapid API.
- Implemented search, filtering, and optimized image loading for improved UX.

STRENGTHS

Team Player

I became a team player by interacting and supporting others. This resulted to team growth and healthy working environment for me.

Go-getter

I am a self motivate individual taking initiative when it's important. This resulted to me being given roles to play in the varies companies I worked with.

Observer

I pay attention to details of the task I am doing. This has helped me delivered excellent results.

PROJECTS

Church Pastoral Assignment System

📅 2021 📍 Gombe, Nigeria

🔗 https://github.com/JohnsCodingLab/easter_posting

Built, Tested, Deployed Maintained the backend and Frontend of a church field assignment app

- Built a field-assignment management platform used to manage over a 1000+ pastors for an annual field assignment.
- Improved assignment efficiency by 70%, reduce data redundancy, conflict detection, and dashboard insights.
- Built using Java/SpringBoot + React with scalable API integration.

Portfolio Website

🔗 <https://levi-johnfavour-portfolio.vercel.app/>

- Designed and built a modern personal portfolio showcasing projects and blog content.
- Deployed on Vercel with SEO optimization and modular component structure.
